

DISHRIGHT !

Our Vision :-

Redefining Cooking !

Problems :-

- **Inconvenience in Scaling Recipes** – Fixed-portion recipes don't adapt to user needs.
- **Ingredient Wastage** – Overestimating or underestimating leads to food waste.
- **Taste & Balance Issues** – Manual adjustments can ruin the dish.
- **Time-Consuming Calculations** – Users struggle with adjusting proportions accurately.
- **Extra Costs** – Buying unnecessary ingredients increases expenses.

We solve those Problems !!

- ✓ **Auto-Scales Recipes** – Adjusts proportions based on servings or available ingredients.
- ✓ **Prevents Food Waste** – Exact measurements, no extra leftovers.
- ✓ **Ensures Perfect Taste** – Maintains the right balance of flavors.
- ✓ **Simplifies Cooking** – No manual calculations needed.
- ✓ **Saves Money** – Buy and use only what's necessary.

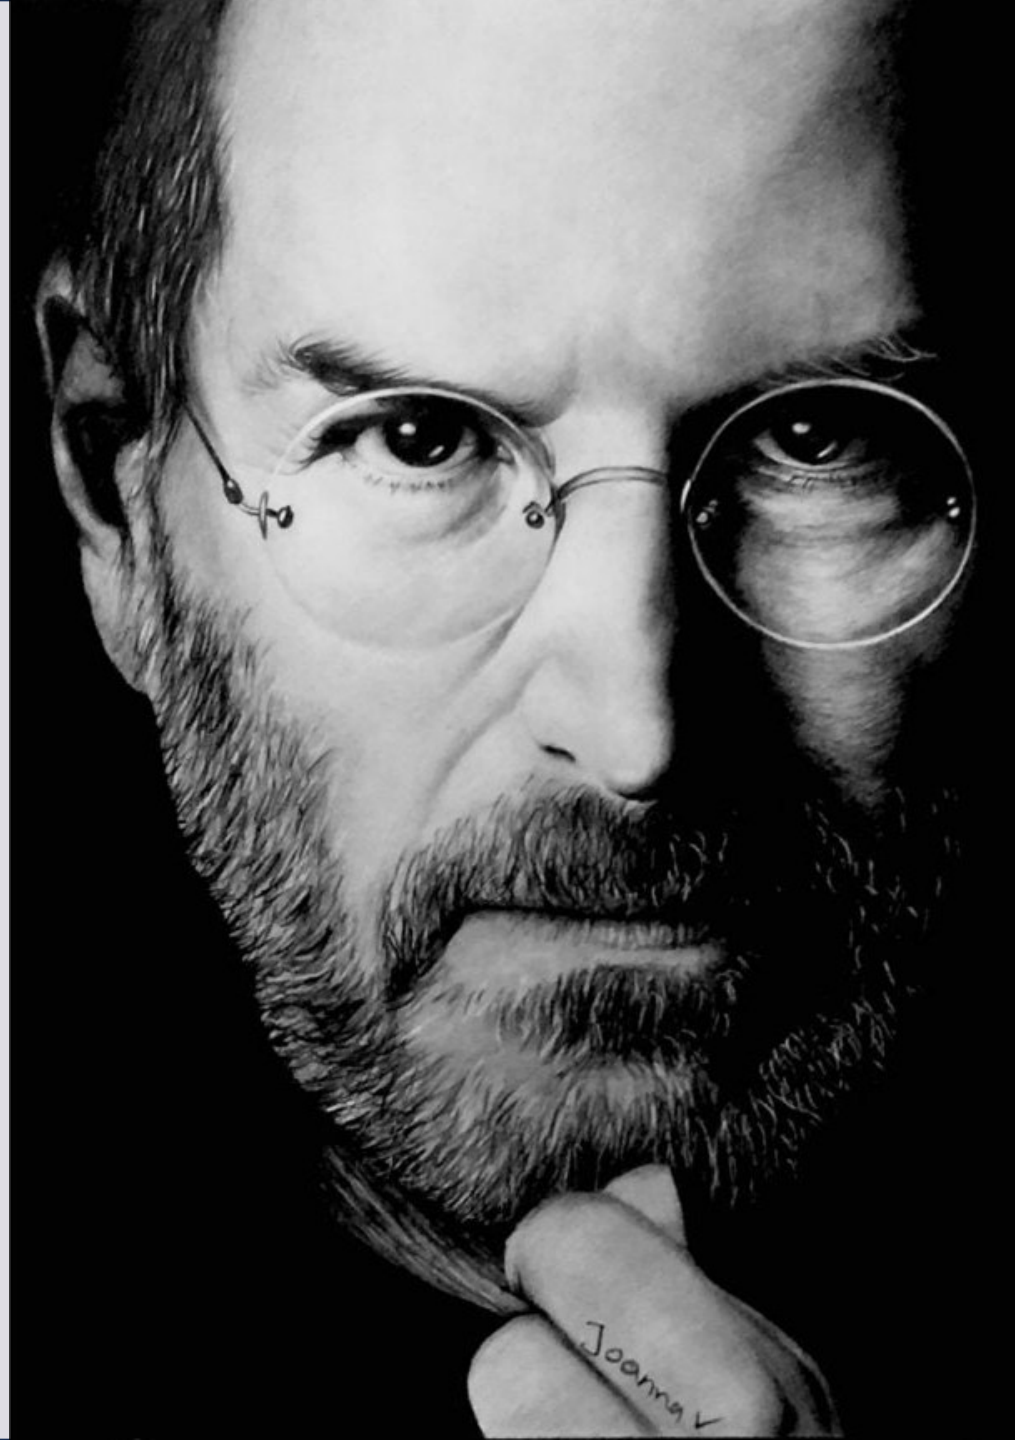

What inspired you for DishRight?

- Problems which people face to estimate raw material proportions while cooking especially when the dish is being prepared for more amount of people than the usual one. So, unless you are very much experienced you're bound to mess up the proportions and ultimately the taste
- When we look for recipes of food items on YT, Websites, etc. you get the idea of process but not of the proportions for a particular taste
- The process of having the feeling of **“cook by yourself”** to **deciding a dish** to **looking for a recipe** to **arrange raw materials** to **actually cook** is just TEDIOUS !!!
- A lot of people having a cooking hobby are not able to easily share their cooking recipes.
- Like in normal house-holds, there are a certain number of dishes which are being made in their day-to-day life. There's their economic and time constraints which restricts them.

“Sometimes you just have to look and not fool yourself and accept that it’s just not really great, its just okay, its good but it can be Better.”

– *Steve Jobs*

So, What is DishRight?

Profile & more

Search bar

User Greeting

Surprise for User

Xplore

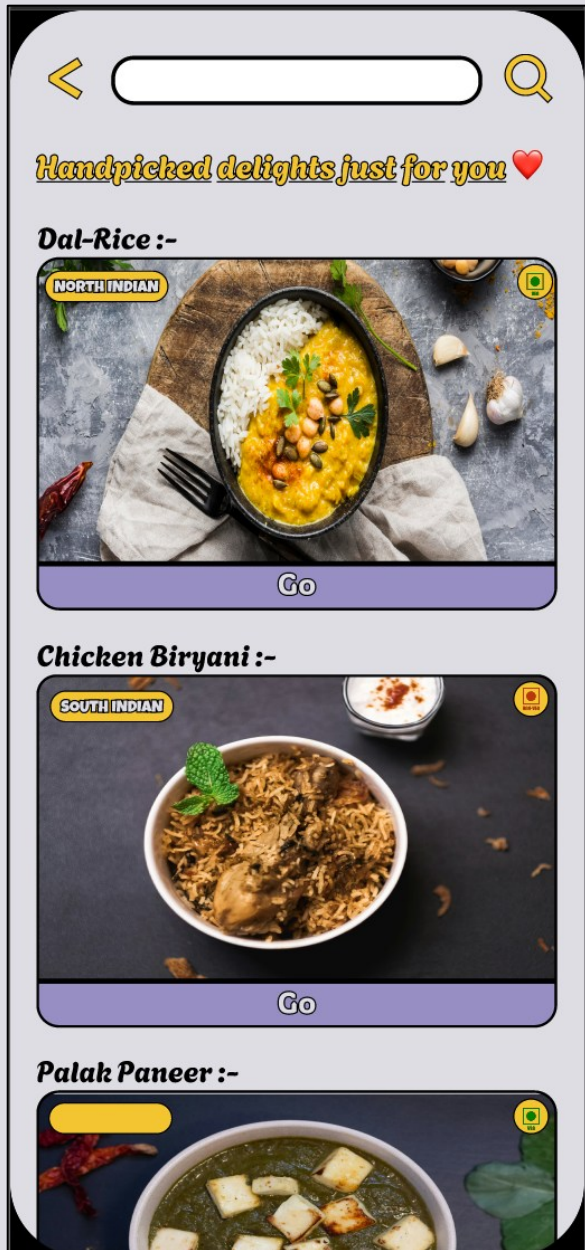

Quick recommendations

A section where user can quickly decide the type of dish

Lens

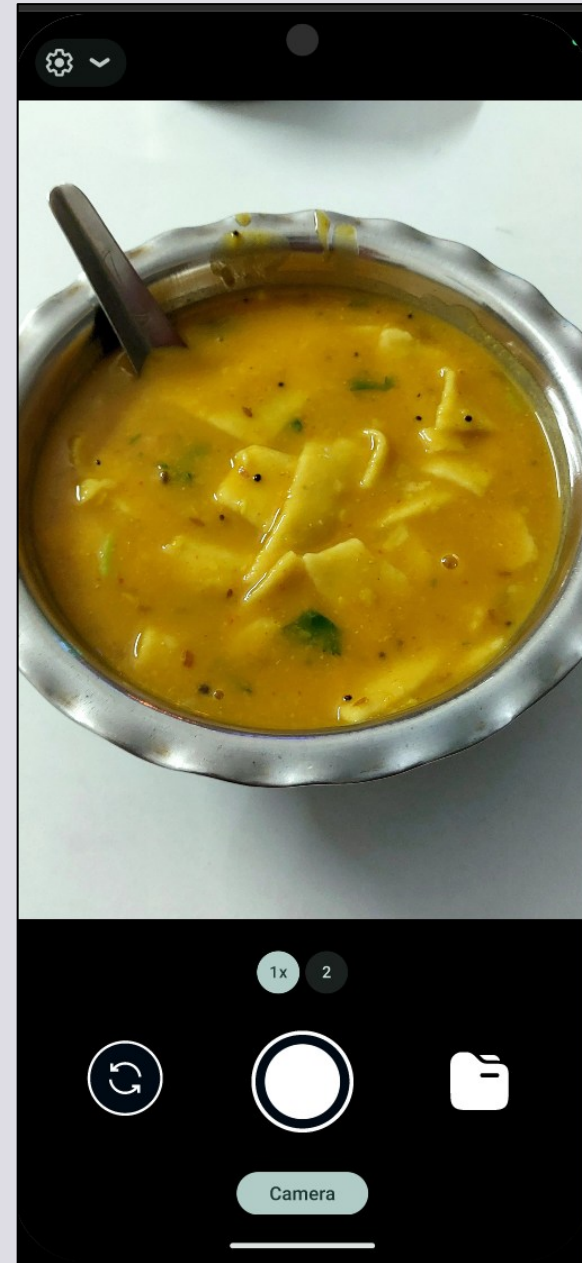

Community

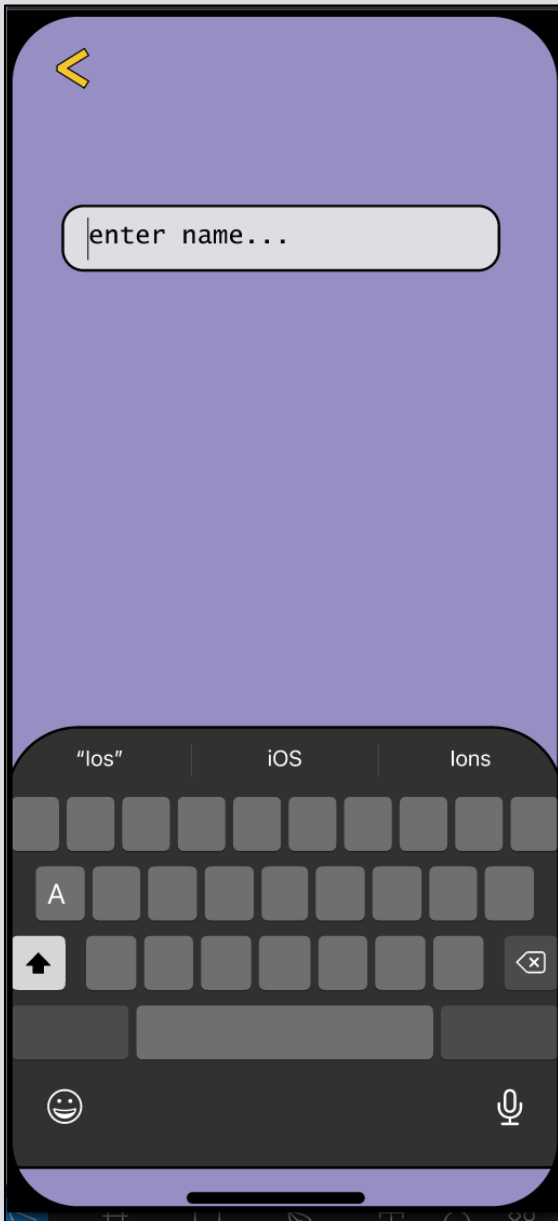

Surprise for User

A dish recommendation list fine-tuned for the user based on the DATA

Lens

Where user can find the name and recipe of a particular dish based on picture

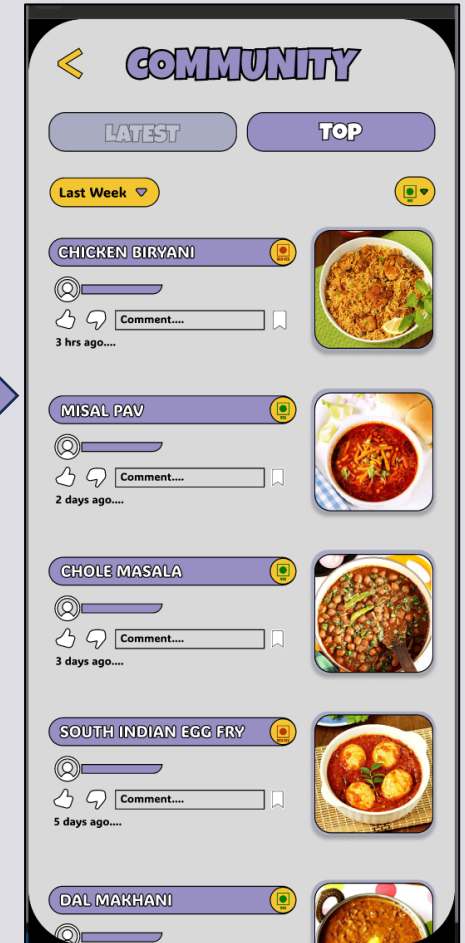

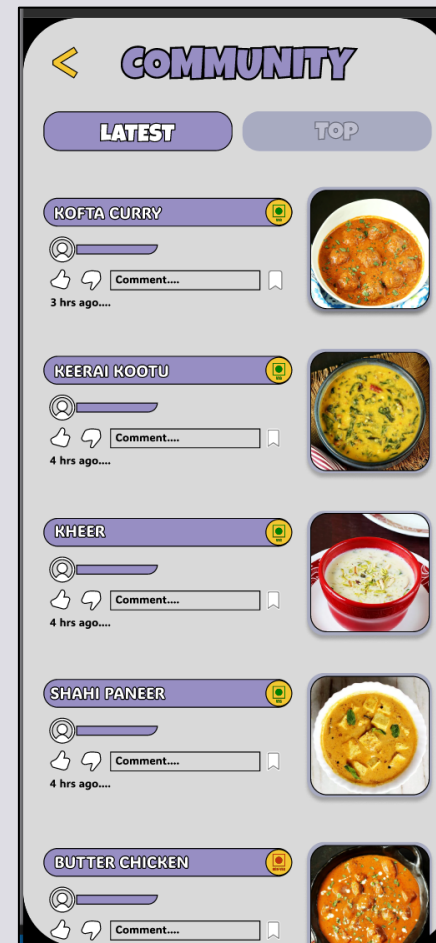

Search bar

User can search the exact dish which he wants to cook

Community

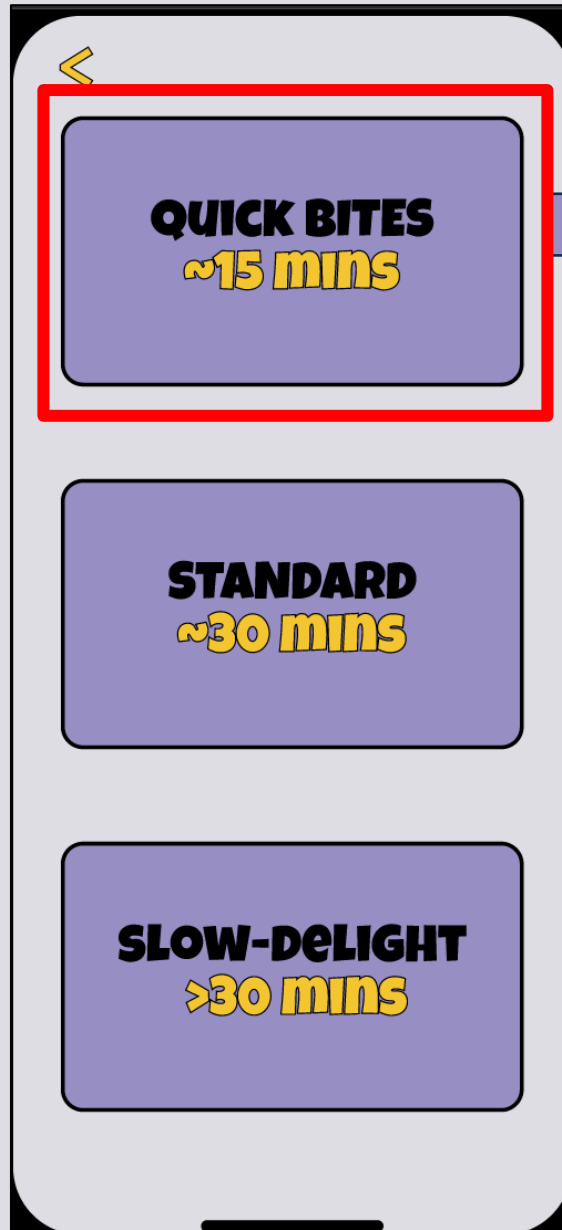

A community where users share their own recipes to the people

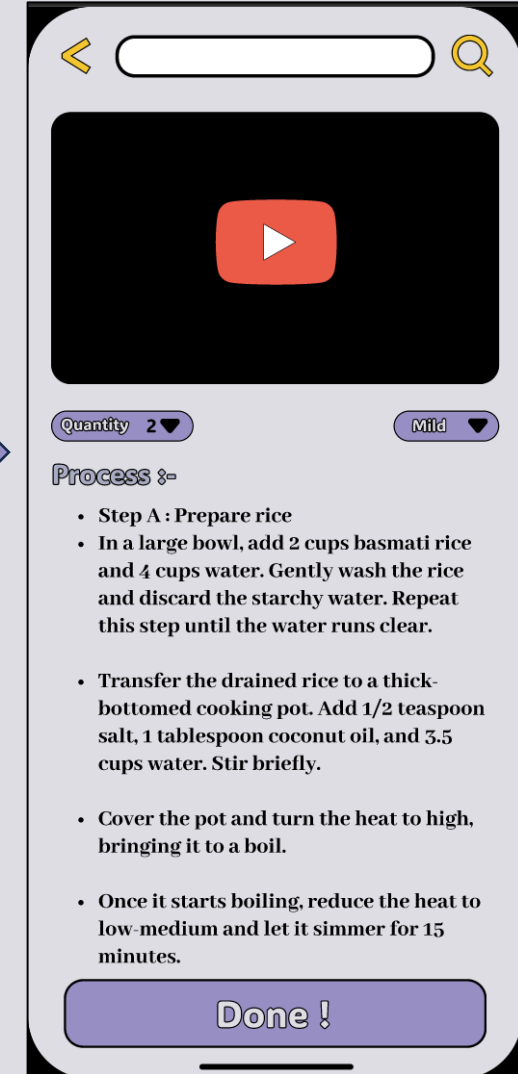

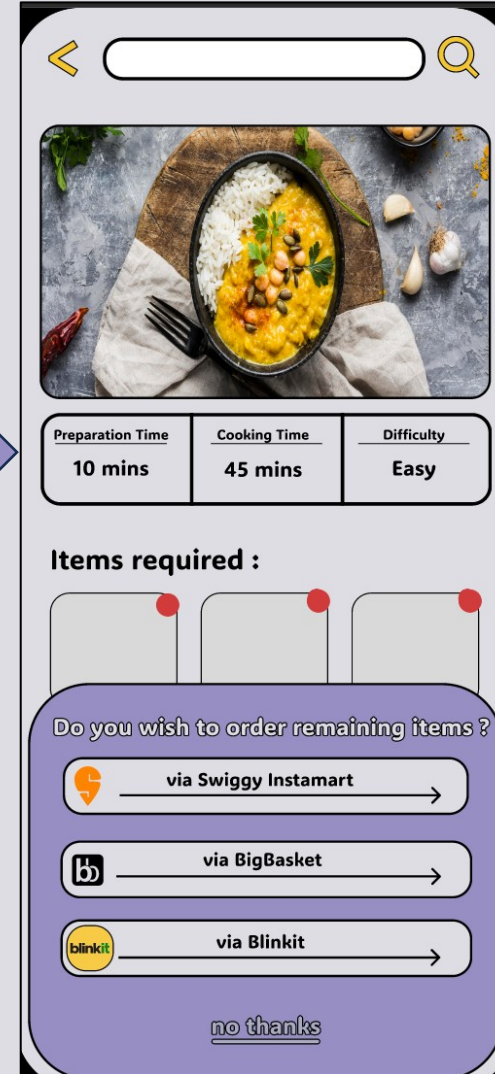

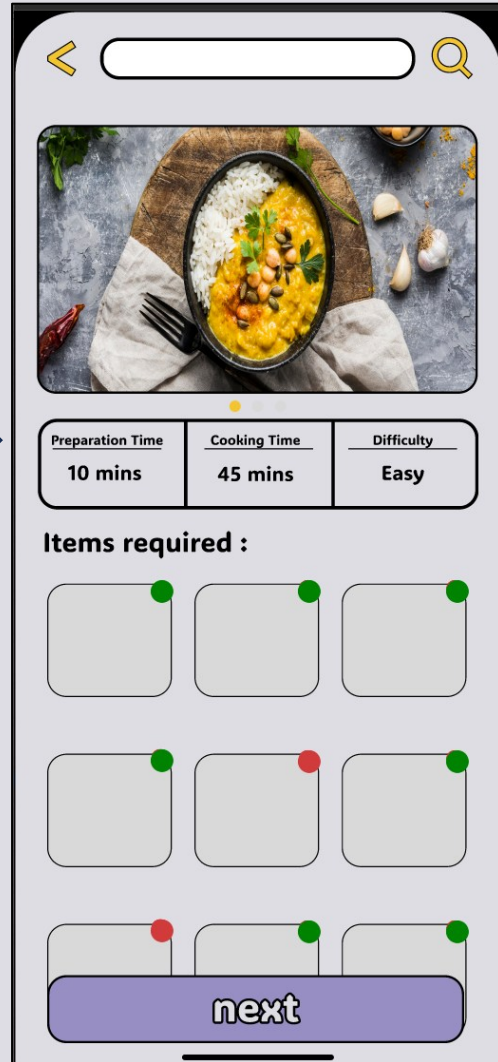

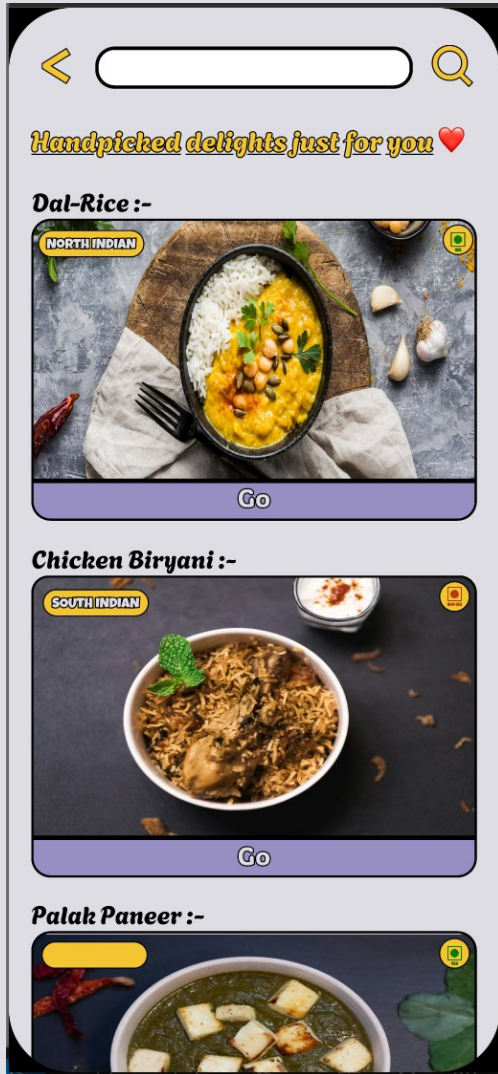

Xplore

A extensive search option
by which user can choose
the dish based upon

- (1) Available Time
- (2) Easy of Cooking
- (3) Veg/Non-Veg
- (4) Region Specific

A Basic flow from dish to Recipe

OPPORTUNITY IN INDIA

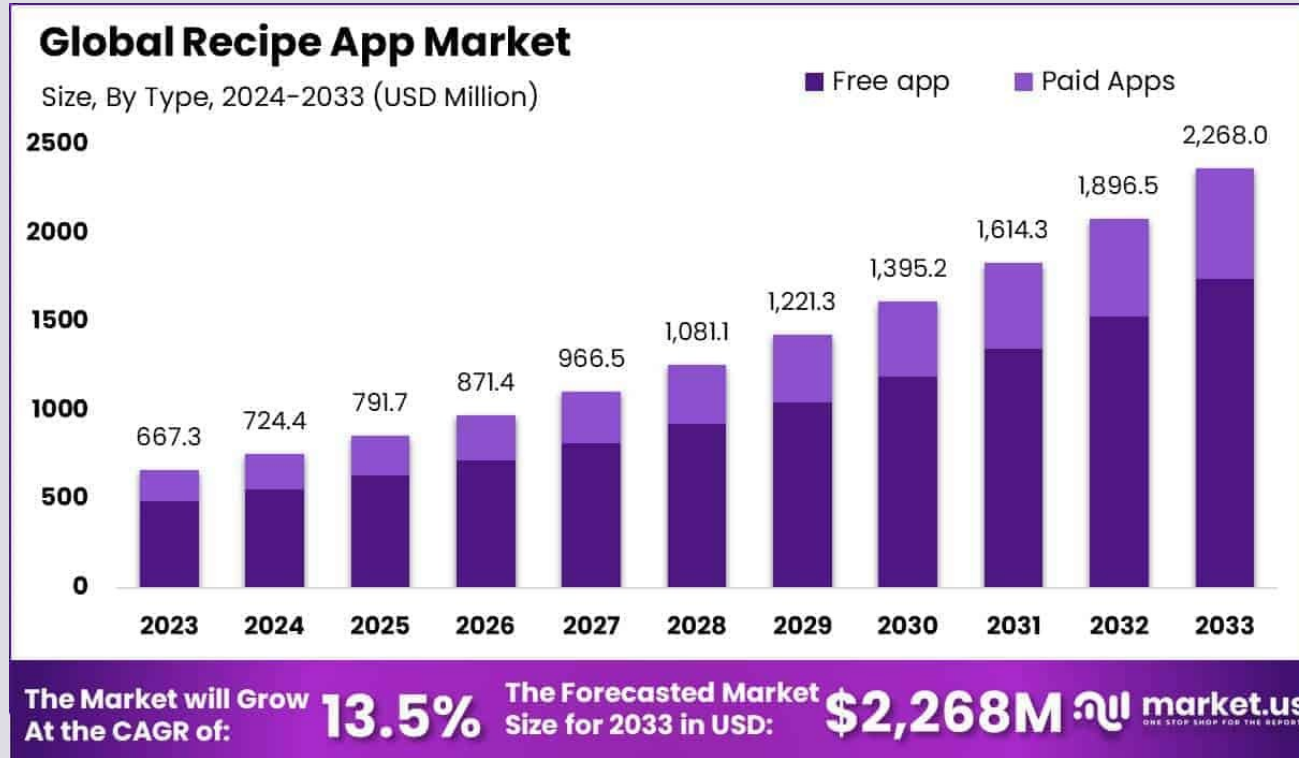

MARKET :-

- **Indian Food-Tech Market** Size: \$79 billion in 2023, growing at **10.2% CAGR**.
- **80%+ of Indian households** cook at home daily,
- Over **500 million** smartphone users and rising internet penetration-> increase Consumption about Food Content
- A **shift** towards health-conscious, home-cooked meals has **increased** post-pandemic

TARGET AUDIENCE :-

- **Home Cooks** 🧑🍳 – Want precise portions for family meals.
- **Students & Bachelors** 🎓 – Need budget-friendly, no-waste meal prep.
- **Cooking Hobbyists** 🔥 – Enhance skills with precise measurements.
- **Health-Conscious Users** – Want **diet-based recipes & meal plans**

GLOBAL MARKET

- **Market Size (2024):- \$724.4M**
- **Projected Market Size (2033): \$2,268M**
- **Global Market Share:-**
 - **North America (35.7%):- \$238.2M**
 - **Europe (31.2%)**
 - **Asia-Pacific region (26,3%)**
- **CookPad :-** Japanese food tech company with 100 million monthly users
 - **Revenue Stream:- Targeted Ads**
 - As of 31-Dec-2024, It has a trailing 12-month revenue of \$38.8M

REVENUE PATHS

- **Advertisements & Sponsorships** 💰 – Food brands, spice companies, kitchen appliance brands.
 - **B2B Partnerships /Data Monetization** 💰 – Integration with **Swiggy, Zomato, Big-Basket, Blinkit**
 - for smart ingredient recommendations
 - Commission for ingredient purchase
 - **Freemium Model** 💰 – Free for basic proportion scaling; premium for advanced meal planning & personalized diet tracking.
 - **In-App Purchases** 💰 – Exclusive **Indian recipe packs, regional meal plans.**
-
- **MAY / MAY NOT IMPLEMENT FOR INDIAN MARKET :-**
 - **Freemium Model** 💰 – Free for basic proportion scaling; premium for advanced meal planning & personalized diet tracking.
 - **In-App Purchases** 💰 – Exclusive **Indian recipe packs, regional meal plans.**

COMPETITIVE ADVANTAGES

- **No Major Competitor** in AI-based recipe proportion scaling.
 - Design for regional dishes unlike CookPad
 - **COMMUNITY FEATURE:-** A community where users share their own recipes to the people. Users can **share and discover recipes**, unlike static recipe apps.
 - **SUGGEST:-** Use AI to suggest recipes based on :-
 - Available ingredients
 - Time constraints
 - User preferences (Veg/Non-Veg, regional cuisine, dietary needs)
- **Dish Recommendation :-**
Recommends dish based on user Data
 - **LENS :-** Users can **click a picture of a dish** and instantly get **Recipe details, ingredient list** and **Cooking steps**
 - **COOKPAD:-** It is limited to be just a Recipe sharing App

GTM (Go To Market) STRATEGY

Pre-Launch

- Market Research
- Product development
- Beta Testing among Students. College groups, Food enthusiasts,etc

Launch

- **Soft Launch in India:**
Targeting top metro cities first where digital adoption is high
- **Acquiring Users** through :-
 - **Digital Marketing**
 - **Paid Advertisements**
- **User retention:-** From APP standout features
 - Personalization
 - Community

Growth

- Pitching to sponsor for Ads and stuff based on active users base
- Collaborating with **Swiggy, Zomato, Big-Basket, Blinkit** for revenue
- More social media marketing
- Sponsoring Physical recipes contests

Scaling

- Expanding to other Tier -1 Cities
- To Tier-2 Cities later on

TECH STACKS

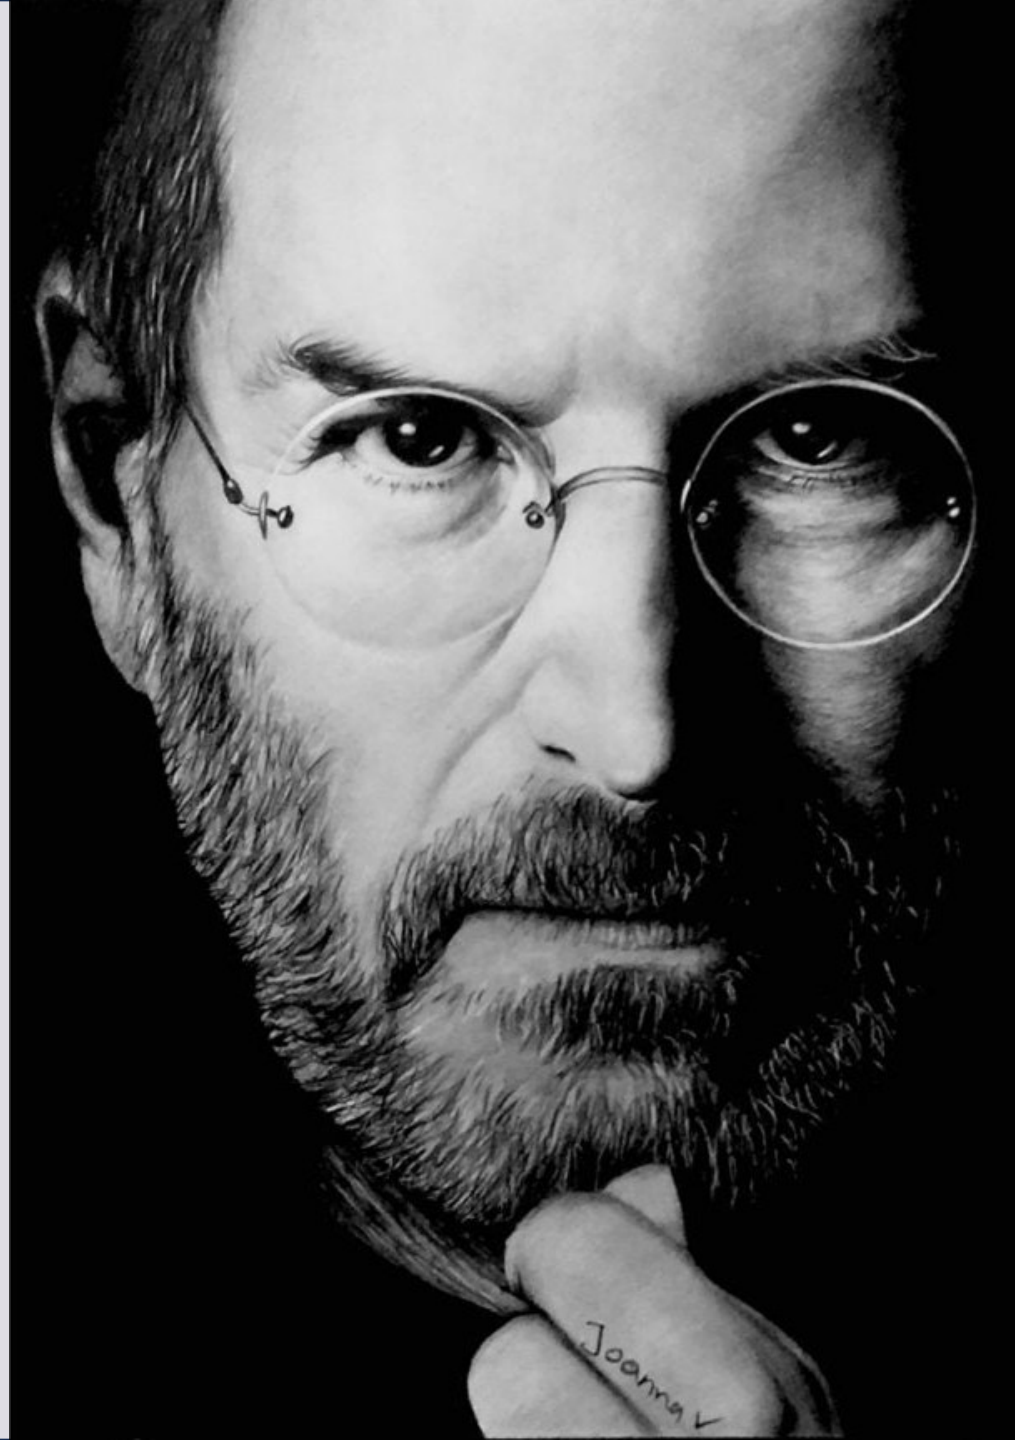

- AI/ML algorithms for dish recommendation and proportion scaling
- Mobile application (Android & iOS)
 - React Native:- For Cross-platform
 - FIGMA:- For UI/UX
- **TensorFlow / PyTorch** :- For AI-based recipe scaling & dish recognition
- Cloud storage for app data and user interactions
 - AWS/Google Cloud
- Financial resources for marketing and operations
- Development team

PROTOTYPE
